Company Overview

About Us

Firemind, an esteemed AWS all-in Advanced Partner headquartered in London, UK, specialises in leveraging data to enhance decision-making and drive business outcomes, setting itself apart with a modern data strategy that elevates businesses globally. Firemind is focused on driving data-driven success in modern organisations.

Recognised as the third-highest accredited AWS partner in EMEA, Firemind boasts a robust portfolio encompassing seven AWS competencies and over fifteen AWS service validations. With a dedicated team proficient in Machine Learning, Artificial Intelligence, Solution Architecture, and AWS Cloud Engineering, Firemind envisions a future where innovation converges with comprehensive cloud solutions.

Through early access to Amazon Bedrock, Firemind crafted PULSE, an agile and versatile tool, enabling rapid deployment of Generative AI solutions. This innovation ensures businesses receive fully viable use cases within a remarkable span of 3 to 6 weeks, driving transformative outcomes.
Firemind's journey has been marked by significant milestones, including being awarded as an AWS Advanced Partner, achieving multiple AWS Competencies, and securing over 150 successful customer launches in the cloud. Notably, Firemind was honoured as the AWS UKI Rising Star of the Year 2023, recognising its outstanding growth and contributions to the AWS ecosystem. Committed to values that drive success, Firemind emphasises long-lasting relationships, humility, collaboration, and accountability in all endeavours.

The company's vision is centred on empowering organisational data culture, unlocking sustained business value, fostering growth, innovation, and success. Firemind's pledge encompasses sustainability in the cloud, championing tech education and diversity, and harnessing the power of partnerships for communal growth.
