AI/ML Engineer

About Firemind

All-in AWS, born in the cloud partner. Firemind is a Generative AI and Data Modernisation specialist partner known for expertise in practical applications of generative AI, helping customers bring projects from prototype to full production, by providing end-to-end support.

Job Description

As an AI/ML Engineer, you will utilise your skills in data analysis, statistical modelling, machine learning, and cloud engineering to build systems that can extract valuable insights from data and drive decision-making. You will leverage your knowledge of AWS cloud services to build and deploy scalable data processing and machine learning solutions. Your ability to transform data into actionable insights will play a crucial role in supporting our client services and enhancing our product, service, and managed service offerings.

Responsibilities

Data Analysis

- Analyse large, complex datasets to extract insights and support decision-making.

Model Development

- Develop statistical models and machine learning algorithms to address business needs.

Explore New Techniques

- Apply the latest practice in GenAI and prompt engineering to enable new data use-cases.

AWS Management

- Use AWS services for data processing, analysis, and machine learning tasks, ensuring scalability and efficiency.

Data Visualisation

- Create data visualisations to effectively communicate findings and insights.

Collaboration

- Work closely with other teams to understand business needs and provide data-driven solutions.

Skills & Experience

Essential

- Proven experience in the data and machine learning space, preferably with a focus on AWS cloud services.
- Strong knowledge of machine learning techniques and statistical modelling.
- Proficient in data analysis languages including Python.
- Experience with data visualisation tools and libraries.
- Exposure to LLMs, multi-modal generative models and prompt engineering.

Desirable

1. Degree in Computer Science, Data Science, Statistics, or a related field is preferred.
2. AWS Associate, Pro or Specialty certification.

What we offer

1. Competitive salary and benefits package.
2. The opportunity to work on cutting-edge technology projects with major clients.
3. A supportive, collaborative, and innovative work environment.
4. Continuous professional development opportunities.

Please note: All applicants must have the right to work in the applicable country. No sponsorship is available for this position.

How to apply

To apply, please submit your CV, cover letter, and any supporting documents. Applications will be considered on a rolling basis until the position is filled. We are an equal opportunity employer and value diversity at our company.
