firemind.

Accelerated Path to production

Professional Services

Augment your Proof of Value (PoV) with Firemind's professional services to build strong data foundations and drive AI production workloads

◎ Arc + AIOps

AIOps removes the heavy lifting for customers and increases the PoV to production conversion rates by managing security, monitoring, model fine tuning, benchmarking, customisation, continuous improvement and cost optimisation

Aware

AI Interest and understanding how it has impacted industry

Active

AI experimentation and proof of value (PoV) with existing processes

Operational

AI PoV converted into production workload creating value

Systemic

Strong AI integration with multiple AI Production workloads

Transformational

AI has transformed the business and is part of the DNA and strategy

Data Maturity Assessment

A comprehensive analysis of businesses data strategy, infrastructure and processes, providing valuable insights that can help measure progress and identity areas for improvement.
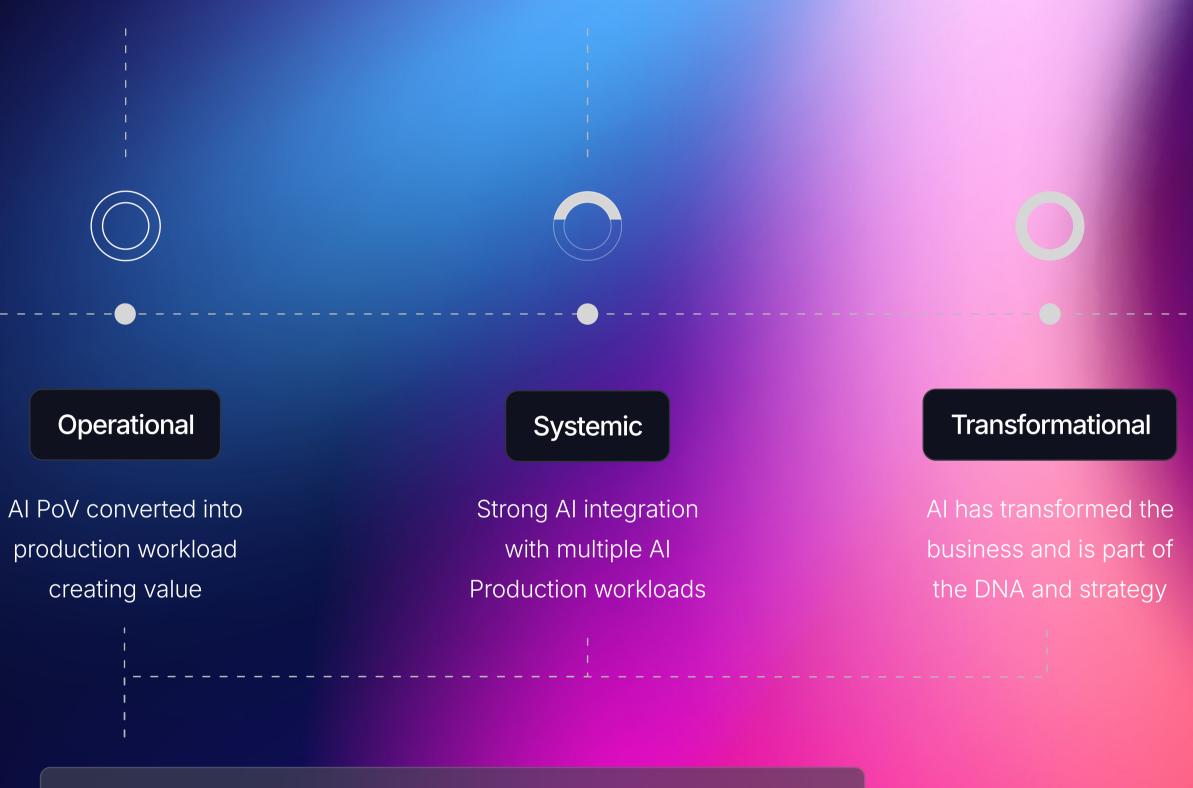

◎ Pulse

Pulse is used to rapidly showcase generative AI use cases to help accelerate time to value. By highlighting clear value, we can demonstrate tangible benefits and a clear path to production.

Packaged solutions

Having served more than 200 customers, Firemind curated a library of ready-to-deploy solution packages across common business functions and industry specific use cases to achieve specific business outcomes.

The packages come with "ready-made integrators" to common systems and building blocks to accelerate deployment as well as straightforward commercial model for ease of purchase.

Ready to drive value from GenAI in your business?
